# IPS-UV Inkjet Printer

IPS-UV Inkjet Printer is developed based on piezoelectric printhead. With our independently innovated automatic ink supply system and high-precision intelligent negative pressure system, it provides customers with high speed, high resolution and stable performance. It supports both side and down printing. UV inkjet printer is widely used in food, beverage, pharmaceutical, daily chemical, electronics, card making, automobile, packaging, printing, tobacco, construction materials and other industries. We provide multiple type of printheads, such as SEIKO, RICOH and KONICA, with single printhead size from 32 to 108mm, one controller with max 6 heads.

<p>Large and multiple size printing, one controller with max 6 printheads.</p>	<p>Intelligent negative pressure system, avoid ink backflow.</p>	<p>Powerful software, support barcode, QR code, UDI code and database printing.</p>
<p>Unified and orderly wiring design, easy for maintenance.</p>	<p>Physical collision avoidance system, protect the printhead perfectly.</p>	<p>Multiple ink color, CMYK and white. Support water based and oil based ink.</p>
